Mathlete wins laurels at international math competitions

Ervin Joshua Bautista
9 - Compassion

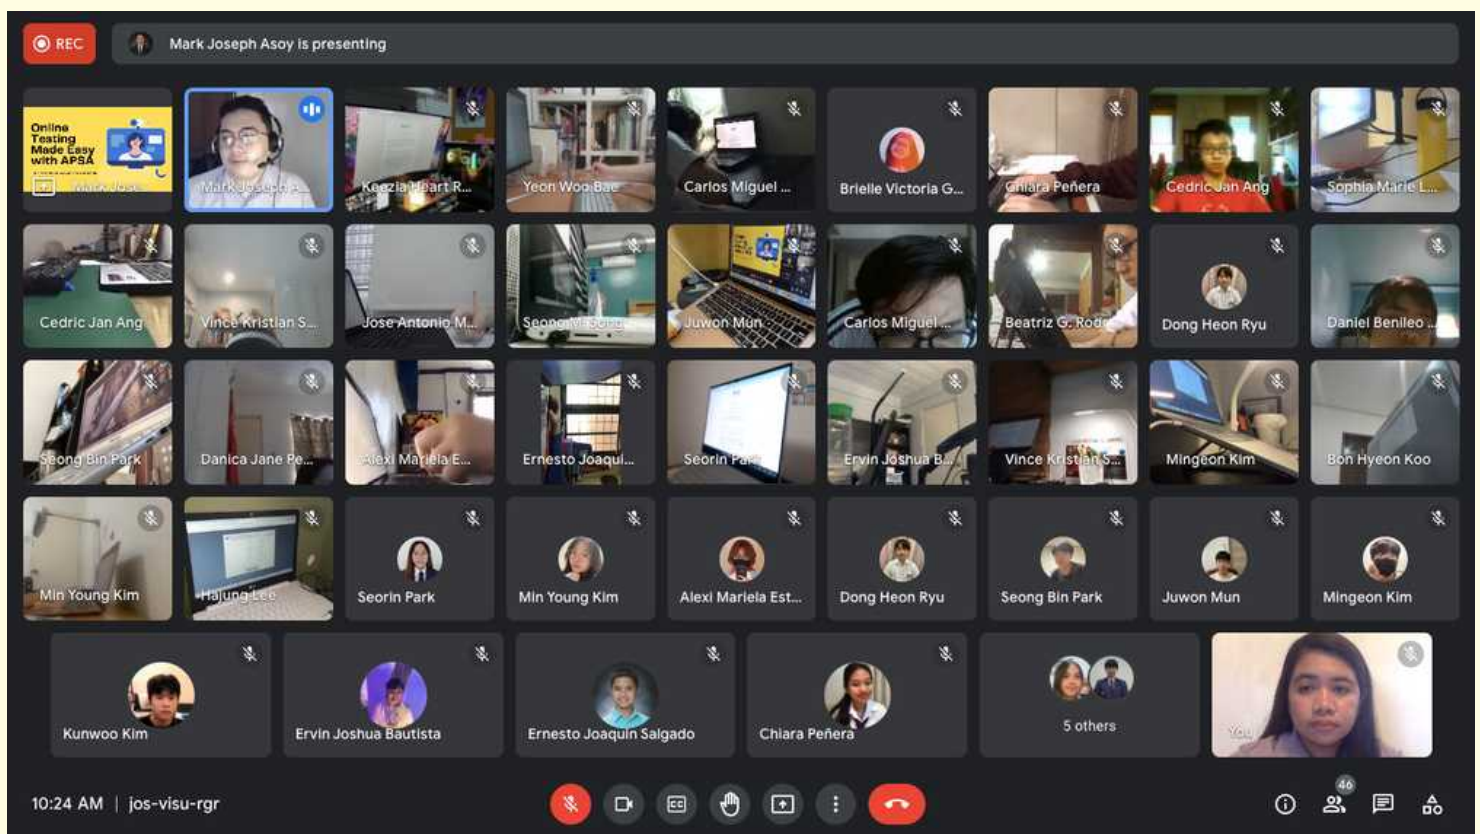

A junior high school student from Southville International School and Colleges (SISC) brought home a gold medal from the Singapore and Asian Schools Math Olympiad held last April 17, 2022. Ervin Joshua Bautista of Gr. 9 – Compassion finished in the top 8% of one of the largest math contests in Asia to receive the award.

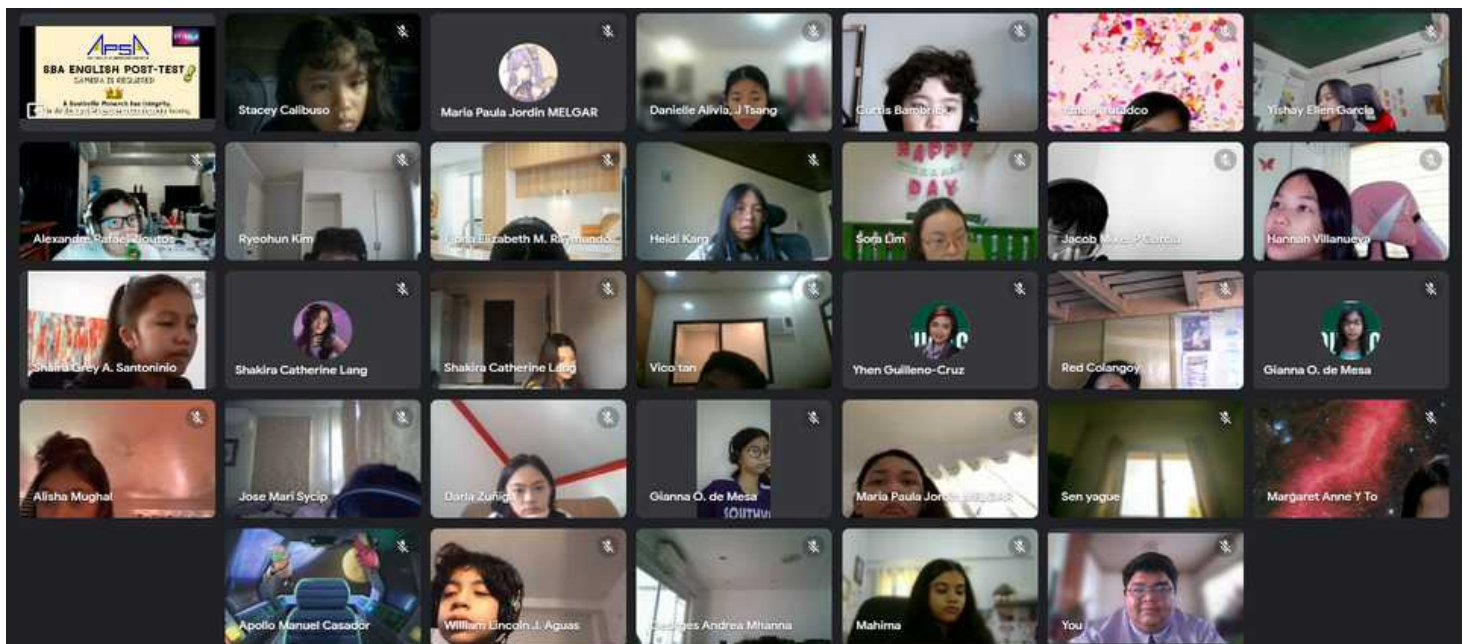

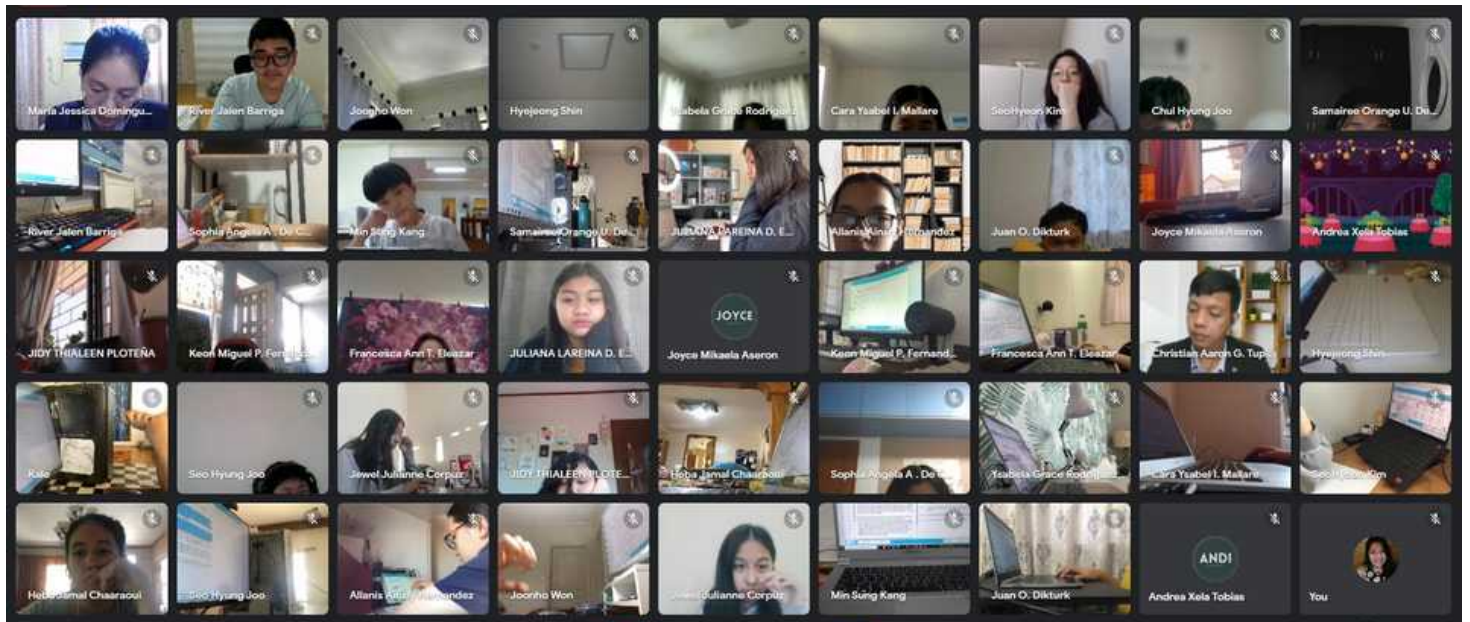

Bautista continued his winning streak by bagging another gold medal in the Copernicus Math Olympiad held online last April 23, 2022. He scored in the top 10% of the Grades 9 & 10 Category to receive the medal plus a certificate of achievement.

Students take standardized tests

To better understand the overall academic performance of students while learning online, SISC recently conducted the annual Standards-Based Assessment (SBA) in English, Math and Science from Senior Kinder (SK) to Grade 10. The SBA results certify students' mastery of content and skills in a specific subject before they move on to the next grade level.

The end-of-year standardized tests are also a way to measure the impact of COVID-19 on learning and to support students with the greatest needs academically. The test results can help measure the unique impact of the pandemic on individual students and provide help to those who need it most.
