K12 REOPENS STATE-OF-THE-ART FINANCIAL LAB

The Southville International School and Colleges (SISC) Financial Lab welcomed back tomorrow's financial leaders to an authentic trading environment. High school students no longer have to wait until they graduate from college to experience all the excitement of the trading floor.

The center features a Technistock Financial and Investor Terminal which provides real-time stock quotes, technical charts, company research, and portfolio tools for analyzing market trends and evaluating financial data to be able to make effective investment decisions. Workstations for performing stock transactions, analyzing companies, and managing virtual and real stock portfolio will enable the students to practice wealth management and to learn what trading is like in the real world.

The lab features LED screens that display real-time market updates, stock quotes and financial news from Bloomberg, ANC, and CNN. There's also a Knowledge Resource Collection of finance and business books donated by the Bangko Sentral of the Philippines to serve as references for students and faculty.

The Financial Lab, located on the fifth floor of the High School Building on Luxembourg Campus, is part of SISC's Financial Literacy Program to familiarize students with the tools used in financial services and to develop future business leaders through innovative opportunities.
