Institutional Survey leads to improvement

SISC is a firm believer that educating a child is a collaborative effort between the home and the school. Just like you, SISC wants what is best for your child in terms of growing in knowledge and in values. We value parents' comments and suggestions that improve the learning experiences of a child.

It is in view of our shared goal that SISC is conducting the Institutional Survey for parents and students. Please answer the Institutional Survey Form for Parents and Students linked to this bulletin so the school will know how it is doing and what more it can do to help your children achieve their potentials and become movers of society. Together, we can make a difference.

Senior High Students Conclude A.Y with Celebratory Performance Tasks

Senior High Monarchs took on the challenge of concluding A.Y. 24-25 last May 17 by organizing simultaneous events which also doubled as their Final Performance Tasks. Music elective students organized a thematic concert at Lux Hall, all of which were inspired by beloved songs from Broadway musicals, whereas students taking the PE elective relived the thrill of experiencing a mini Intramurals at Monarchs Gym. Both events were composed of Grade 11 & 12 students taking the Music and PE electives under the guidance of sir DJ Caraan and sir Angelou Langga, respectively.

Mumps

What is Mumps?

Mumps is a contagious illness caused by a virus. It usually affects the glands on each side of the face, making them tender or painful.

How is it transmitted?

Mumps is easily spread by airborne droplets from the upper respiratory tract. A person can spread mumps by coughing, sneezing, or talking. It can also be spread by sharing items such as cups and utensils. And by touching objects with unwashed hands that are then touched by others.

Can Mumps Be Prevented?

The best protection is to be **immunized** against mumps. For most kids, mumps protection is part of the **measles-mumps-rubella vaccine (MMR) or measles-mumps-rubella-varicella vaccine (MMRV)**. Sometimes, people who have been vaccinated will still get mumps but their symptoms will be much milder than if they had not gotten the vaccine.

Symptoms

Symptoms of mumps show up about 2 to 3 weeks after exposure to the virus. Some people may have no symptoms or very mild symptoms.

The first symptoms are similar to flu symptoms such as:

Fever

Headache

Muscle aches or pain

Loss of appetite

Tiredness

Swelling of the salivary glands usually starts within a few days. Symptoms may include:

- Swelling of one or both glands on the sides of the face
- Pain or tenderness around the swelling
- Less often, swelling of glands below the floor of the mouth

How Is Mumps Treated?

Swelling of the salivary glands usually starts within a few days. Symptoms may include:

- Give patient plenty of fluids and soft foods that are easy to chew. Don't give acidic fruit juices (like orange juice, grapefruit juice, or lemonade) that can make parotid gland pain worse.
- Give medicine to bring down fever or ease pain, such as acetaminophen or ibuprofen.
- Soothe swollen parotid glands with either warm or cool compresses (whichever feels better).
- Encourage plenty of rest.
- Mumps patients should stay home for 5 days from the start of the parotid gland swelling.

MUMPS IS CAUSED BY A VIRUS, SO IT CANNOT BE TREATED WITH ANTIBIOTICS. ANTIBIOTIC WORK ONLY AGAINST BACTERIA.

WHY STRUCTURE AND CONSISTENCY ARE IMPORTANT FOR KIDS

Consistency means that we follow through with what we say we are going to do. It gives power to our words. Consistency allows boundaries and expectations to be set, which actually provides children with a sense of safety. Structures and routines also help kids learn how to control their behaviors.

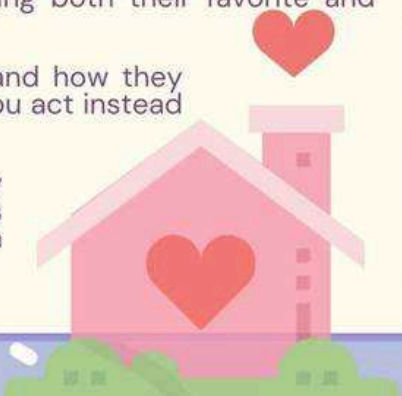

Both parents are on the same page and respond in similar ways to poor behavior, implementing the same structure and discipline for specific behaviors. Early on, children are taught to set one parent against the other when they see poor communication between them or when the parents have different expectations.

Start small. Call a family meeting and engage the child or children in choosing the appropriate consequences for targeted (rather than general) conduct. This interaction will help them understand and abide by them.

Start routines. Routines help in so many ways provide. It gives a sense of security and gain self control. This encourages them to understand the value of anticipating both their favorite and unfavorable activities that they need to do and are necessary.

Choose action over talking. Assure your child of the expectations and how they should respond when they are not met. Words have more meaning if you act instead of reminding them multiple times.

Make some rules and bend SOME of them, but only rarely. Flexibility is important, but it shouldn't compromise your consistency. Sometimes the rules need to be changed, but choose those times carefully. Explain the reason for the change to the child and help him/her understand.
