Give Your HEART a "Break"

What is the heart?

The **heart** is a fist-sized organ that pumps nearly 2,000 gallons of blood throughout your body. It's your circulatory system's main organ, bringing oxygen and nutrients to your cells and maintaining your blood pressure. Unlike other muscles, it cannot "rest" when overworked.

Since your **heart** plays such a vital role, it's important to take care of it.

How can I keep my heart healthy?

Achieve and maintain a weight that's healthy for you.

Eat **heart**-healthy foods like plenty of fruits, vegetables and whole grains.

Be physically active for at least 150 minutes per week.

Manage your stress with healthy strategies like meditation or journaling.

Avoid / limit drinking alcohol.

Get quality sleep.

Avoid / Quit smoking or using tobacco products.

Take steps to prevent certain infections that may lead to **heart** concerns.

Follow your healthcare provider's treatment plan like blood pressure monitoring and medications.

Love your Heart... Protect your Life!
